

**Wavelink Avalanche®** is the supply chain industry's leading solution for automated wireless device and infrastructure management. Wavelink Avalanche cuts your costs by reducing the burden on your IT resources and eliminating labor-intensive management of mobile equipment. Depending on your business needs, Wavelink® has the right solution to manage and control your wireless ecosystem.

### Avalanche Site Edition™

Created as a simplified alternative for those organizations that do not need infrastructure management (access points and wireless switches) or a complex network architecture (distributed servers), Avalanche Site Edition (SE) is a powerful yet easy-to-use management solution that provides complete visibility and control of mobile devices from a central console.

### Avalanche Mobility Center™

A comprehensive management solution for the wireless enterprise, Avalanche Mobility Center provides complete visibility and control of wireless infrastructure and mobile devices from a central console. Avalanche MC eases the configuration, deployment, and management of wireless networks while offering extensive flexibility through the support of a wide range of mobile devices and infrastructure.

Feature	Avalanche SE	Avalanche MC
Agnostic support for a full range of mobile devices	●	●
Advanced security: extensive protocol support, device lockdown, access control and optional Avalanche CE Secure™	●	●
Advanced remote helpdesk tools and optional Avalanche Remote Control™	●	●
Device provisioning	●	●
Asset management	●	●
User management	●	●
Profile-based management	●	●
Advanced statistics and reporting	●	●
Wireless infrastructure management		●
Distributed servers across the enterprise		●

Wavelink's flexibility allows you to add infrastructure management, and/or the ability to extend the Avalanche Management architecture to multiple distributed servers. Seamlessly upgrade at no additional charge to Avalanche MC when your business needs demand.
