

eLearning

Removing the boundaries of conventional training

Conventional technical training can become a repetitive, time-consuming task that involves travel and time out of the office. Wavelink understands that training is a critical part of the product purchasing cycle but that it can add additional expenses and create a costly loss of productivity.

However, undergoing product training is important if you want to fully reap the benefits of a product. At Wavelink we want our customers to fully understand and use the power of our solutions to their benefit but without hindering resources. Through Wavelink eLearning, we provide a comfortable way to deliver high quality training to employees without the hefty expense, inconvenience, and loss of productivity that is equated with off-site training.

A set of online training classes, Wavelink eLearning is a great way to deliver training material without leaving the comfort of your home or office. A simple way to present to large groups or individuals, Wavelink eLearning is a cost-effective method for continuous education and overall productivity enhancements. Just hop online at your convenience and take any one of the numerous pre-recorded eLearning sessions on your Wavelink solution.

Wavelink's online classes cover the full range of Wavelink products from either the technical or sales perspective. The free-flowing modules have been broken down into different sections allowing you to pick-up what's relevant to you, whether that's installing and configuring a Wavelink solution or focusing on different aspects of our voice products, you can login and receive training that's configured to suit your needs.

Available technical classes include: Avalanche Mobility Center, Avalanche Site Edition, CE Secure, Remote Control, Communicator (Push-to-Talk), Avalanche Package Builder, Terminal Emulation, TE Screen Reformatter, and Speakeasy Script Building. For those seeking more of a sales perspective or a general overview classes and demonstrations include; Avalanche Return on Investment, Remote Control Sales Overview, Communicator (Push-to-Talk) Sales Overview, Communicator Demonstration, and a Speakeasy Demonstration.

Key Benefits

Convenient – Easily balance the demands of work and home by learning about your Wavelink solution at your convenience, either from work, at home or on the road.

Relevance - All content-managed courses stay up-to-date, ensuring that the most accurate, relevant information reaches you or your employees.

Affordable – By eliminating the costs of travel your organization will realize immediate cost savings. On average companies can save between 50-70% by eliminating travel expenses.

Immediate – With just a few mouse clicks and an Internet connection you can begin your Wavelink eLearning modules in no time.

Self-Directed and Convenient- Learn at your own pace, focus on what you need, skip what you know, repeat sections. With Wavelink eLearning you are always in control of learning where, when, and what you want with unlimited access 24 hours a day, seven days a week.

Innovative Software Solutions

Avalanche Mobility Center

Avalanche Mobility Center (MC) is a comprehensive management solution for the wireless enterprise that provides complete visibility and control of mobile devices and wireless infrastructure from a central console.

Avalanche Site Edition

Built for the SMB market, Avalanche Site Edition (SE) is a streamlined device management alternative for organizations that do not require infrastructure management or do not have a complex network architecture.

Avalanche CE Secure

Avalanche CE Secure allows administrators to restrict access to mobile devices, their applications and data. CE Secure also encrypts and/or deletes critical data on mobile devices when they are lost or stolen.

Remote Control

Avalanche Remote Control enables a customer's IT department to remotely diagnose and remedy both device applications and device settings, or simply provide assisted guidance for an end-user, which reduces mobile device downtime and increases end-user productivity.

Terminal Emulation

Wavelink's Terminal Emulation (TE), the industry standard, enhances the productivity of your mobile workforce, IT staff and the applications and devices they use.

Industrial Browser

Wavelink Industrial Browser extends Web-based applications to your mobile workforce, which offer businesses significant advantages with simplified application development, reduced cost of ownership and enhanced on-screen data representation.

Speakeasy

Wavelink Speakeasy easily adds 100% client-side speech-to-text and text-to-speech functionality to existing applications, enabling the creation of highly intuitive, easy-to-use applications that require minimal end-user training.

Communicator

Wavelink Communicator is a serverless client-side push-to-talk software solution aimed at enhancing on-the-floor and enterprise wide communication. Organizations can now extend push-to-talk, walkie-talkie functionality to their existing devices.

Studio

Wavelink Studio enables JAVA and COM developers to create and deploy powerful server-side enterprise wireless applications for wireless data collection, barcode scanning and RFID devices.

The Industry Leader

Since 1992, Wavelink has grown to become the largest company of its kind with software running on more than 4,000,000 devices. Wavelink Corporation is the leading provider of mobile device and infrastructure management and mobile applications in the enterprise mobility market. Wavelink's technology solves the unique challenges involved in deploying, managing and controlling mobile devices and other wireless network elements, and facilitates peak performance from wireless technology, applications and end users. Over 10,000 companies in the retail, manufacturing, government and logistics industries rely on Wavelink to accelerate application delivery, reduce device management and support costs, and tighten network security.
